

INITIATIVE BRIEF

Centralized Application Inventory and Ownership System

Initiative Type: Technology

Department: Operations

Submitter: Example Owner

Business Owner: Not yet provided

Executive Sponsor: Not yet provided

Status: Draft

Executive Summary

Create a reliable application inventory so business stakeholders can identify owners and purpose. *[ai-draft]*

Business Need

Problem / Opportunity: Applications have no verified owners. *[ai-draft]*

Current State / Process: Teams track their applications in separate spreadsheets. *[ai-draft]*

Proposed Future State

Desired Outcome: A central inventory with validated business purpose and ownership. *[ai-draft]*

High-level Approach: Consolidate applications in a reviewable inventory. *[ai-draft]*

Initial Prototype: Validate a pilot inventory with two business units. *[ai-draft]*

Expected Business Value

Qualitative Value: Clear accountability and reduced duplication. *[ai-draft]*

Monthly hours saved: Not yet established *[reviewed]*

Revenue opportunity: Not yet established *[reviewed]*

Cost savings: Not yet established *[reviewed]*

Success Measures

Drafted measure (review before accepting): Not yet established *[ai-draft]*

Potential measure (suggestion): Percentage of applications with a validated owner *[suggestion]*

Risks, Constraints & Unknowns

Risks / Considerations: Ownership validation requires stakeholder review. *[ai-draft]*

Critical unknown: Who owns the application inventory?

Future discovery: What is the integration architecture?

Future discovery: How will technical deployment be phased?

Recommended Next Steps

Confirm an inventory owner and test a pilot. *[ai-draft]*

Initiative Assessment

Overall Score: 45/100 · Low

Readiness: Low

Business value: 25/25

Strategic alignment: 8/10

Readiness score: 10/10

Delivery confidence: 7/10

Risk / complexity: -11 (complexity -6, risk -5)

Customer impact score: 6/15

Revenue potential score: 0/15

Cost savings score: 0/15

AI readiness category: Low

Technical complexity: Medium

Compliance risk: Medium

Supporting Context

Linked Jira: APP-123

Context (user fact): Applications are tracked in multiple repositories
